

# Material Health Report feedback form

Now you have had the opportunity to consider the contents of the Material Health report please tick the box most representative of your views.

We would be grateful if you could spend a few minutes completing the following short questionnaire.

	Strongly disagree	Disagree	Agree	Strongly agree
The presentation of the findings of the study is clear and informative.				
I would have liked more information.				
The concept of an ecological footprint helped my understanding of resource use.				
The NHS should adopt ecological footprinting as a benchmarking tool.				
Ecological footprinting is too much of a 'black box' approach				
The findings have changed my thinking about the use of resources.				
I would be prepared to change my lifestyle to reduce my use of resources				
The presentation of the methodology of the study is clear and informative				
I would have liked more details of the methodology				
I think that the report should prove to be useful in informing policy.				
I am confident that the NHS is doing enough to prevent the unnecessary depletion of natural resources.				

If you have any further comments please make note of these in the space provided:-
